

SD SERIES. STRAIGHT/METAL PCB D-SUB

General

The SD*B and SD*G Series D sub-straight dip soldering connectors are designed to be mounted vertically on PCBs. Directly connected to the circuits on PCBs, they are suitable for saving labor in mounting. 9, 15, 25, 37, and 50-contact models available.

Features

- (1) Compact and sturdy due to a metal shell.
- (2) Saves gold by plating contacts with gold and PCB-contacting parts with solder.
- (3) Directly mountable vertically on PCBs in high density and easily connectable to a cable plug.
- (4) A wide variety of combinations available, such as dip soldering (HD), crimping (CD), and ribbon IDC termination (FD).
- (5) Uses insulation made from highly heat-resistant and chemical resistant glass-containing resin (UL94V-0).

Applications

Computers, peripherals and terminals, control equipment, and measuring instruments.
